SWG3

VENUE TECHNICIAN

We're on the lookout for a passionate and experienced Venue Technician with a lighting bias to join our Tech department at SWG3. If you have strong experience within the technical side of Live Events, this is the perfect opportunity for you.

As the Venue Technician, you should have a solid background working with Lighting and Audio for live events and a great ability to work within a team. Good knowledge of Chamsys, Midas, Allen & Heath, d&b and R1 is desired, and an IPAF would be an advantage, but training can be provided if needed.

As Venue Technician you would work underneath the Technical and Assistant Technical Manager, alongside two further venue techs. Your responsibilities include:

- operating lighting and sound for events
- assisting touring productions on show days
- the maintenance and repair of equipment
- keeping backstage and public facing areas tidy and safe

We are looking for an excellent communicator who enjoys building positive working relationships, supports colleagues and who can remain friendly and calm in the hectic environment of live events. A proactive approach to venue maintenance and a commitment to finding better ways of working are essential.

You should have a good understanding of Health & Safety policies and be able to follow company guidelines as well as using common sense when assessing situations for potential risks.

Please send your CV cover letter along with two references to jay@swg3.tv.
